Foreword

In presenting this catalogue of the Gold Coins of the United States to the public, I believe it to be a much needed guide both to new and advanced collectors. The values quoted are for fine cabinet specimens, uncirculated coins are worth more while worn pieces may be bought for much less. The values are based on auction records and the average prices asked by reputable dealers. Where values are not given, the coins come up for sale so seldom that the price is a matter of demand and cannot be based on previous sales which may have been many years ago. Special attention is called to the coins of the branch mints as the scale of values has been made up from many years of experience in the handling of this somewhat neglected series.

The values given for the Philadelphia double eagles, eagles and half eagles from 1859 to the end of this type are for proof coins only as they are seldom collected, or in demand, in other condition.

Please note that this is not a price list although I can supply many of the coins listed at similar prices to the valuations. Nor is it a premium list but merely a guide to collectors as to the maximum they should pay.

WAYTE RAYMOND.
